

Modifications of Awarded Project

In the instance that modifications have been applied to the project awarded with the Mark, including altered or enhanced communication content and intent, the award winner must submit an Alteration Report to the organizer.

The organizer and then-presiding Evaluation Committee will then deliberate the extent of the modifications made (i.e. if the changes made conflict with the prior evaluation) and advise the winner of their decision to approve or reject the continued usage of Unity Mark for that specified project.
